

Department of Health and Human Services
Health Resources & Services Administration Radiation Exposure Screening and
Education Program Modification 1

Document Type:	Modification to Previous Grants Notice
Funding Opportunity Number:	HRSA-08-063
Opportunity Category:	Discretionary
Current Closing Date for Applications:	Mar 20, 2008
Expected Number of Awards:	7
Estimated Total Program Funding:	\$1,540,000
CFDA Number:	93.257 -- Grants for Education, Prevention, and Early Detection of Radiogenic Cancers and Diseases
Cost Sharing or Matching Requirement:	No

Eligible Applicants

Statutory Preference: Only health care organizations located in one of the high-impact States according to RECA (P.L. 106-245) are eligible to apply. Eligibility is open to non-profit organizations, including faith-based and community-based organizations in one of the high-impact States (AZ, CO, ID, NV, NM, ND, OR, SD, TX, UT, WA, WY).

Agency Name

Health Resources & Services Administration

Description

The purpose of RESEP is to encourage and support appropriate healthcare organizations to improve the knowledge base and health status of persons adversely affected by the mining, milling or transporting of uranium and the testing of nuclear weapons for the Nation's weapons arsenal.

Department of Health and Human Services
National Institutes of Health
NIDDK Multi-Center Clinical Study Implementation Planning Grants (U34)

Document Type:	Grants Notice
Funding Opportunity Number:	PAR-08-057

Opportunity Category:	Discretionary
Current Closing Date for Applications:	Mar 18, 2010
Funding Instrument Type:	Cooperative Agreement
CFDA Number:	93.847 -- Diabetes, Endocrinology and Metabolism Research
CFDA Number:	93.848 -- Digestive Diseases and Nutrition Research
CFDA Number:	93.849 -- Kidney Diseases, Urology and Hematology Research
Cost Sharing or Matching Requirement:	No

Eligible Applicants

Independent school districts
Special district governments
Native American tribal organizations (other than Federally recognized tribal governments)
Small businesses
State governments
For profit organizations other than small businesses
Native American tribal governments (Federally recognized)
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
County governments
Others (see text field entitled "Additional Information on Eligibility" for clarification)
Private institutions of higher education
Public and State controlled institutions of higher education
Public housing authorities/Indian housing authorities
City or township governments
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Faith-based or community-based organizations can apply.

Description

-Purpose. NIDDK supports investigator-initiated, multi-center clinical studies through a two-part process that includes an implementation planning (U34) grant. The U34 planning grant is designed to: (1) permit early peer review of the rationale for the proposed clinical study; (2) permit assessment of the design/protocol of the proposed study; (3) provide support for the development of a complete study protocol and associated documents including a manual of operations and (4) support the development of other essential elements required for the conduct of a clinical study. Completion of the required products of a U34 grant is a prerequisite for submission of a multi-center clinical study cooperative agreement (U01) application, which will support the actual conduct of the study. - Mechanism of Support. This Funding Opportunity Announcement (FOA) will utilize the U34 grant mechanism. -Funds Available and Anticipated Number of Awards. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. Although the financial plans of the Institutes and Centers

(ICs) provide support for this program, awards pursuant to this funding opportunity are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

- Public and State controlled institutions of higher education
- Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education

For profit organizations other than small businesses
Faith-based or community-based organizations can apply.

Description

-This PAR provides for grant applications for investigator-initiated, multi-center clinical studies. NIDDK supports investigator-initiated, multi-center clinical studies through a two-part process that includes an implementation planning (U34) grant. Beginning with the June 5, 2008 receipt date, NIDDK will accept, peer review, and consider for funding applications for investigator-initiated, multi-center clinical studies only from NIDDK Multi-Center Clinical Study Implementation Planning (U34) grant awardees (See PAR-08-057 for information on NIDDK Clinical Study Implementation Planning Grants), except in cases when an exemption from this requirement has been given by NIDDK. Completion of the required products of a U34 grant is a prerequisite for submission of a multi-center clinical cooperative agreement (U01) application under this PAR. -Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received. -This Funding Opportunity Announcement (FOA) will utilize the U01 grant mechanism.

For profit organizations other than small businesses
Private institutions of higher education
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Faith-based or community-based organizations can apply.

Description

-Purpose. This initiative solicits R01 applications that link drug abuse, HIV/AIDS prevention and/or treatment, and the criminal justice system. Applications responsive to this FOA should conduct intervention research or propose descriptive research that can clearly lead to effective new interventions. - Mechanism of Support. This FOA will utilize the NIH Research Project Grant (R01) award mechanism -Funds Available and Anticipated Number of Awards. This initiative has \$3,000,000 set aside (\$2,500,000 from NIDA and \$500,000 from NIMH) to fund approximately 4-6 meritorious applications. It is anticipated that NIDA will fund 3-5 awards and NIMH will fund one award. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

Special district governments
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Public housing authorities/Indian housing authorities
City or township governments
Native American tribal governments (Federally recognized)

Additional Information on Eligibility:

Eligible agencies of the Federal Government are eligible to apply. Foreign institutions are not eligible to apply. The institution must be able to demonstrate a commitment to the development of the research careers of junior underrepresented minority research scientists in biomedical cancer research.

Description

The Comprehensive Minority Biomedical Branch (CMBB), Office of Centers, Training and Resources (OCTR), Office of the Deputy Director for Extramural Sciences (ODDES), National Cancer Institute (NCI), invites transition career development award applications from recipients of the NCI Mentored Career Development Award for Underrepresented Minorities or from advanced postdoctoral and/or newly independent research scientists representative of groups underrepresented in biomedical, behavioral, clinical, or social sciences. The purpose of the NCI Transition Career Development Award to Promote Diversity (K22) is to provide "protected time" for recipients to develop and receive support for their initial cancer research program. This award is intended to facilitate the transition of underrepresented postdoctoral research scientists from the mentored to the independent stages of their careers in cancer research. The unique feature of this award is that the individuals may apply without a sponsoring institution while they are still in a mentored position.

Department of Health and Human Services
National Institutes of Health
Understanding and Preventing Brain Tumor Dispersal (R01) Grant

Document Type:	Grants Notice
Funding Opportunity Number:	PAS-08-048
Opportunity Category:	Discretionary
Current Closing Date for Applications:	Jan 07, 2011
CFDA Number:	93.393 -- Cancer Cause and Prevention Research
CFDA Number:	93.853 -- Extramural Research Programs in the Neurosciences and Neurological Disorders
Cost Sharing or Matching Requirement:	No

Eligible Applicants

Native American tribal governments (Federally recognized)
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Special district governments
Small businesses
City or township governments
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Others (see text field entitled "Additional Information on Eligibility" for clarification)
Independent school districts
Public housing authorities/Indian housing authorities
Native American tribal organizations (other than Federally recognized tribal governments)
Public and State controlled institutions of higher education
For profit organizations other than small businesses
State governments
County governments
Private institutions of higher education
Faith-based or community-based organizations can apply

Description

-Purpose. The goal of this program announcement is to promote studies that 1) identify the properties of brain tumor cells that cause them to migrate; 2) determine how interaction of tumor cells with normal brain elements affects migration; and 3) translate understanding of these parameters into interventions

that target invading tumor cells. -Mechanism of Support. This funding opportunity announcement (FOA) will utilize the NIH Research Project Grant (R01) mechanism and will run in parallel with an FOA of identical scientific scope, PAS-08-049, that solicits applications under the NIH Exploratory/Developmental (R21) mechanism. -Funds Available and Anticipated Number of Awards. NINDS has set aside \$400,000 in total costs per year for this announcement and a parallel announcement that utilizes the R21 mechanism (see above). These funds are in addition to funds available for applications that score within the NINDS payline and depend on the overall scientific merit of the application and availability of funds throughout the duration of the announcement. NCI will consider programmatic priority and scientific merit in making funding decisions. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received.

Public housing authorities/Indian housing authorities
City or township governments

Description

-This Funding Opportunity Announcement (FOA) issued by NIDA, National Institutes of Health, solicits applications to establish Pilot Proteomics Centers that will address the complex biological mechanisms of interactions among drugs of abuse and HIV pathogenesis, their treatments, and host responses. The centers will use proteomics technologies and other related technologies (i.e., gene expression profiling) to look for protein changes and molecular signatures of disease progression of HIV/AIDS in combination with substance abuse/addiction, HIV treatment, and/or treatments for substance abuse. These proteomics centers are expected to help identify mechanisms related to susceptibility to and progression of HIV infection, viral replication, and viral evolution, particularly related to neuroAIDS. The use of advanced tools to better understand the molecular and cellular consequences of HIV-1 infection and substance abuse in the era of HAART will likely lead to the identification of new biomarkers for disease progression and new avenues for clinical research and interventions. - The total amount to be awarded is \$2,000,000 to support one or two centers using the P20 mechanism. Individual awards will be limited to \$700,000 direct costs for each of three years. -Eligible organizations include: Public/State Controlled Institution of Higher Education, Private Institution of Higher Education, Nonprofit with 501(c)(3) IRS Status (Other than Institution of Higher Education), Nonprofit without 501(c)(3) IRS Status (Other than Institution of Higher Education), Small Business, For-Profit Organization (Other than Small Business), State Government, U.S. Territory or Possession, Indian/Native American Tribal Government (Federally Recognized), Indian/Native American Tribal Government

(Other than Federally Recognized), Indian/Native American Tribally Designated Organization.

Description

Executive Summary Purpose. This Funding Opportunity Announcement (FOA) represents the continuation of an NCI program to facilitate the transition of investigators, primarily those with clinical doctoral degrees as well as those with doctoral degrees working in the areas of cancer prevention, control, behavioral,

or population science research, from the mentored stage of career development in academic cancer research to the independent stage. This goal is achieved by providing protected time through salary and research support for 3 years to: postdoctoral individuals or junior faculty in mentored positions transitioning into their first independent position; and investigators within the first 2 years of their first independent cancer research position, to initiate and develop their independently-supported cancer research programs.

Description

Purpose: This Funding Opportunity Announcement (FOA) is designed to enhance the basic and applied cancer prevention research. The National Cancer Institute (NCI) invites applications that propose small and time-limited projects pertinent to the development of cancer chemoprevention agents, biomarkers for early cancer detection, cancer-related nutrition science, and/or clinical prevention studies that focus on specific target organs. Proposed projects may involve basic and/or translational research and/or human subjects-oriented research. However,

treatment-related quality-of-life population-based studies, as well as projects focused on cancer etiology, metastasis, or treatment will be considered non-responsive to this FOA. New, as well as established, investigators in relevant fields and disciplines (e.g., chemoprevention, nutritional science, genetics, infectious agents, and early detection, including biomarker development and validation) are encouraged to apply for these small grants to test the feasibility of innovative ideas or carry out pilot studies. Ultimately, these small grants are expected to facilitate the development of full research projects (e.g., research project grants/parent R01)

Description

-Purpose. The NIH Blueprint for Neuroscience Research is a framework to enhance cooperative activities among the NIH Office of the Director and 15 NIH Institutes and Centers that support research on the nervous system. This Funding Opportunity Announcement (FOA) is released in affiliation with the Neuroscience Blueprint, with Institutes and Centers participating independently. This FOA solicits Small Business Innovation Research (SBIR) grant applications that propose to continue the process of developing complex instrumentation,

clinical research tools, or behavioral interventions and treatments. This FOA specifically invites applications for the competing renewal of previously funded Phase II SBIR grants to further develop the aforementioned types of technologies. -Mechanism of Support. This FOA will utilize the SBIR (R44) Phase II grant mechanism for this Competing Renewal of a Phase II grant -Funds Available and Anticipated Number of Awards. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

Short Courses in Integrative and Organ Systems Pharmacology (R25) Grant

Document Type:	Grants Notice
Funding Opportunity Number:	RFA-GM-08-010
Opportunity Category:	Discretionary
Current Closing Date for Applications:	Feb 26, 2008
Estimated Total Program Funding:	\$1,000,000
CFDA Number:	93.859 -- Biomedical Research and Research Training
Cost Sharing or Matching Requirement:	No

Eligible Applicants

Private institutions of higher education
Public and State controlled institutions of higher education
Small businesses
For profit organizations other than small businesses
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Others (see text field entitled "Additional Information on Eligibility" for clarification)
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education

Description

Purpose. The purpose of this FOA is to solicit applications for Education Projects to develop and deliver short courses that will provide students with a 2-3 week intensive research education and training in the area of Integrative and Organ Systems Pharmacology. These courses will introduce students to the knowledge and skills needed for studies of integrative organ system and whole organism

biological responses to drugs and other physiological perturbations. The project should develop an appropriate, innovative curriculum to teach basic concepts and experimental techniques. A combination of lectures, demonstrations, and extensive hands-on experience is encouraged. Inclusion of independently funded follow-up experiences at the home institution or through industrial internships is encouraged. Course evaluations and dissemination of the developed curricular materials are expected. The courses are intended to benefit and serve the entire research community, not primarily the host institution. Participation of faculty from multiple institutions is encouraged. Students should be recruited from the national pool of potentially interested scientists. Students will likely be drawn from graduate programs in pharmacology, physiology, toxicology, and related disciplines. However, the course should be open to participation of other students at advanced levels of training and career stages, and to students from industry and government as well as from academia. The research education and training should foster their ability to assume leadership roles in all three sectors. The goal of these Education Projects will be to strengthen the research personnel base in the United States by broadening the exposure of students to training in integrative and organ systems sciences.

Description

CDC's Procurement and Grants Office has published a funding opportunity announcement entitled, "Research for Preventing Violence and Violence-Related Injury (R01)." Approximately \$1,800,000 will be available in fiscal year 2008 to fund approximately 5 to 6 awards. The purpose of the program is to expand and advance our understanding of violence, its causes, and prevention strategies. For complete program details, please see the full announcement on the CDC website at <http://www.cdc.gov/od/pgo/funding/CE08-003.htm>. The estimated funding date is prior to August 31, 2008.

Cost Sharing or Matching Requirement: Yes

Eligible Applicants

Applicants are limited to section 330 funded health center grantees (i.e., Community Health Centers, section 330(e); Migrant Health Centers, Section 330(g); Health Care for the Homeless, Section 330(h); and Public Housing Primary Care, Section 330(i) of the Public Health Service Act. Additional eligibility requirements will be included in the application materials. Applicants are limited to section 330 funded health center grantees (i.e., Community Health Centers, section 330(e); Migrant Health Centers, Section 330(g); Health Care for the Homeless, Section 330(h); and Public Housing Primary Care, Section 330(i) of the Public Health Service Act. Additional eligibility requirements will be included in the application materials.

Description

Mental health/substance abuse, oral health and comprehensive pharmacy services are critical to improving the health status of communities served by health centers and reducing disparities in access to health care. Applicants for this funding opportunity are expected to: 1) describe the target population and its need for mental health/substance abuse services, oral health and comprehensive pharmacy services; 2) present a service delivery plan that demonstrates responsiveness to the identified needs of the target population; and 3) present a sound business plan that links the goals and objectives from the service delivery plan to the budget. The Consolidated Health Center Program includes: 1) Community Health Centers, section 330(e); 2) Migrant Health Centers, section 330 (g); 3) Health Care for the Homeless, section 330(h); and 4) Public Housing Primary Care, section 330(i). The populations served by these programs are: medically underserved populations in urban and rural areas; migratory and seasonal agricultural workers and their families; homeless people, including children and families; and residents of publicly-subsidized housing.

Department of Health and Human Services
National Institutes of Health
Extinction and Pharmacotherapies for Drug Addiction (R01) Grant

Document Type:	Grants Notice
Funding Opportunity Number:	RFA-DA-08-024
Opportunity Category:	Discretionary
Current Closing Date for Applications:	Feb 27, 2008
Estimated Total Program Funding:	\$1,500,000
CFDA Number:	93.279 -- Drug Abuse and Addiction Research Programs
Cost Sharing or Matching Requirement:	No

Eligible Applicants

Independent school districts
Special district governments
State governments
Public and State controlled institutions of higher education
Native American tribal governments (Federally recognized)
County governments
Private institutions of higher education
Others (see text field entitled "Additional Information on Eligibility" for clarification)
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Small businesses
Native American tribal organizations (other than Federally recognized tribal governments)
City or township governments
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Public housing authorities/Indian housing authorities

For profit organizations other than small businesses
Faith-based or community-based organizations can apply

Description

-Purpose. The purpose of this Funding Opportunity Announcement (FOA) is to stimulate animal or human research on mechanisms underlying extinction in order to guide the development of interventions for enhancing extinction of drug-seeking behavior. It is expected that research supported under this FOA will ultimately be used to guide and implement combined behavioral/cognitive and pharmacological/molecular interventions for the treatment of drug abuse relapse.

-Mechanism of Support. This FOA will utilize the NIH Research Project Grant (R01) mechanism and runs in parallel with an FOA of identical scientific scope, RFA-DA-08-025, that solicits applications under the R03 grant mechanism. - Funds Available and Anticipated Number of Awards. It is anticipated that \$1.5 million in total costs will be awarded to 4-6 applications for this announcement and its companion RFA (DA-08-025).

 may only apply as a joint applicant with an entity that is so certified. Please
 access the full announcement for all additional information on eligibility. Faith-
 based and community organizations are eligible to apply. Foreign entities are not
 eligible under this announcement.

Description

The Administration for Children and Families (ACF), Office of Community
 Services (OCS), will accept applications for grants to establish and administer
 Assets for Independence (AFI) projects. Grantees provide an array of supports
 and services to enable individuals and families with low incomes to become
 economically self-sufficient for the long-term. A primary feature of each AFI
 project is that project participants are given access to special matched savings
 accounts called Individual Development Accounts (IDA), in which participants
 save earned income for the purchase of a home, for business capitalization, or to
 attend higher education or training. Applications will be screened and evaluated
 as indicated in this announcement. Unsuccessful applicants may submit new
 applications in any succeeding application cycle. This is a standing

announcement. This announcement supersedes the standing announcement published in the Federal Register on February 2, 2005. It will be effective until cancelled or changed by the Director of OCS. Application due dates are January 15 and March 25 in 2008, 2009, and 2010.

Description

-This funding opportunity (FOA) is aimed at enhancing nanoscience and nanotechnology research focused on problems in biology and medicine. Nanoscience and nanotechnology refer to research and development on the understanding and control of matter at a length scale of approximately 1 - 100 nanometers, where novel properties and functions occur because of the size. -A major challenge facing medicine is to develop novel and more sophisticated approaches for the diagnosis, treatment and management of an array of diseases and traumatic injuries. Nanotechnology and nanoscience have the capacity to drive a new wave of medical innovation through the engineering of bioactive nanoscale structures, processes and systems based on the advancement of our understanding of biology at the nanoscale.

Description

-Purpose. This Funding Opportunity Announcement (FOA) issued by the National Institute on Drug Abuse, National Institutes of Health, encourages Research Project Grant (R01) applications from institutions/organizations that propose the development of sustained pharmacotherapies and behavioral treatments to reduce the risk of contraction and transmission of HIV. Specifically, this FOA supports applications directed at the development of (1) heroin/morphine-protein conjugates (heretofore referred to as heroin/morphine conjugate vaccines or HCVs) for the treatment of opiate addiction, (2) clinical systems for the application of currently available long-acting (30-day or longer sustained-release) dosage forms for opiate pharmacotherapies to optimize these sustained pharmacotherapies to effect the reduction of the risk for acquisition and transmission of HIV, and (3) effective clinical treatment modalities, including behavioral treatment in conjunction with pharmacotherapies, to improve the effectiveness of opiate treatment and reduce the risk behaviors associated with transmission of HIV. Clinical studies should include the assessment of HIV risk behaviors as an outcome measure. -Mechanism of Support. This FOA will utilize the NIH Research Project Grant (R01) award mechanism. -Funds Available and Anticipated Number of Awards. NIDA intends to commit initially a total of \$4 million for FY 2008 to this Program Announcement to fund 6-8 meritorious applications that address the goals of this FOA. Set-aside funds for future years have not been determined. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
For profit organizations other than small businesses

Description

Purpose: The purpose of this Funding Opportunity Announcement (FOA) is to continue support for the Regional Centers of Excellence for Biodefense and Emerging Infectious Diseases Research (RCE) Program. The overall goal of the RCE Program is to establish and maintain strong infrastructure and multifaceted research and development activities to provide scientific information and translational research capacity that will facilitate the next generation of therapeutics, diagnostics and vaccines against the NIAID Category A-C Priority Pathogens (<http://www3.niaid.nih.gov/topics/BiodefenseRelated/Biodefense/default.htm>) and emerging infectious diseases (EID) agents (<http://www3.niaid.nih.gov/research/topics/emerging/list.htm>). Mechanism of Support: This FOA will use the NIH Specialized Centers Cooperative Agreement funding mechanism (U54). Funds Available and Anticipated Number of Awards: The NIAID expects to commit approximately \$91 million in FY 2009 to support up to 10 awards in the range of \$3 million to 12 million direct costs per year each. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

City or township governments
County governments
Faith-based or community-based organizations can apply.

Description

-Purpose. The purpose of this FOA is to stimulate research on non-coding RNAs and other post-transcriptional regulatory mechanisms as they pertain to addictive processes. -Mechanism of Support. This Funding Opportunity Announcement (FOA) will utilize the R01 grant mechanism and runs in parallel with a FOA of identical scientific scope, RFA-DA-08-017, that solicits applications under the R03 grant mechanism. -Funds Available and Anticipated Number of Awards. We anticipate a total of \$1.5 M will be available to support RFA-DA-08-016 and RFA-DA-08-017. We anticipate funding up to 3 R01 awards and 3-8 R03 awards. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications. INMHA will consider co-funding meritorious applications in this area involving Canadian scientists and institutions.

Others (see text field entitled "Additional Information on Eligibility" for clarification)
Public and State controlled institutions of higher education
For profit organizations other than small businesses
Public housing authorities/Indian housing authorities
Special district governments
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Small businesses

Faith-based or community-based organizations can apply.

Description

-Purpose. The purpose of this FOA is to stimulate research on non-coding RNAs and other post-transcriptional regulatory mechanisms as they pertain to addictive processes. -Mechanism of Support. This Funding Opportunity Announcement (FOA) will utilize the R03 grant mechanism and runs in parallel with a FOA of identical scientific scope, RFA-DA-08-016, that solicits applications under the R01 grant mechanism. -Funds Available and Anticipated Number of Awards. We anticipate a total of \$1.5 M will be available to support RFA-DA-08-016 and RFA-DA-08-017. We anticipate funding up to 3 R01 awards and 3-8 R03 awards. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications. Institute of Neurosciences, Mental Health and Addiction (INMHA) will consider co-funding

meritorious applications in this area involving Canadian scientists and institutions.

Department of Health and Human Services
National Institutes of Health
Special Topic Education Course: Exploring Auditory and Vestibular Biology (R25) Grant

Document Type:	Grants Notice
Funding Opportunity Number:	RFA-DC-08-003
Opportunity Category:	Discretionary
Current Closing Date for Applications:	Jun 17, 2008
CFDA Number:	93.173 -- Research Related to Deafness and Communication Disorders
Cost Sharing or Matching Requirement:	No

Eligible Applicants

Others (see text field entitled "Additional Information on Eligibility" for clarification)
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Public and State controlled institutions of higher education
Private institutions of higher education

Description

-Education (R25) grant mechanism to fund a newly developed and dedicated educational course in the auditory and vestibular biological sciences. It is anticipated that during a five year award period, three courses will be held (2009, 2011, 2013). It is also anticipated that each year of the course will cover a breadth of knowledge in fundamental auditory/vestibular biology, including disease and disorders, and be combined with hands-on exposure to current technologies and methodologies used in auditory and vestibular research laboratories. -The NIDCD intends to commit approximately \$1,050,000 total costs to fund one new application in response to this FOA. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications. -Purpose. The NIDCD is encouraging applications which will provide a special topics course in auditory and vestibular biology in an established educational environment that has a

proven track record of excellence in providing 2-3 week specialized topic courses.

Public housing authorities/Indian housing authorities
Small businesses

Description

Purpose. The National Heart, Lung, and Blood Institute (NHLBI) and National Human Genome Research Institute (NHGRI) solicit grant applications under this Funding Opportunity Announcement (FOA) to develop and validate a resequencing application for cost-effective, high-throughput sequencing of genome-wide medical targets by assembling current and emerging technologies in the areas of DNA target capture and sequencing. The sequencing targets are primarily all exons of the 20,000 protein coding genes identified as RefSeq genes in Entrez Gene database at the National Center for Biotechnology Information (NCBI), which account for 1-2% of the human genome, but could include other types of functional units such as microRNA and regulatory elements. The purpose of developing this resequencing application is to enable the sequencing of thousands of individual DNA samples in NHLBI's well-phenotyped populations in a cost-effective manner. Applicants must therefore demonstrate the potential to reduce costs towards this goal, while providing data of sufficient quality for distinguishing sequence variants. Applicants must develop full-scale targeted genome resequencing systems and work collaboratively within this program to develop standard procedures for this targeted resequencing technology.

Mechanism of Support. This FOA will utilize the NIH Research Project Grant (R01) award mechanism. However, when suitable, principal investigators are expected to form working groups on specific challenges. **Funds Available and Anticipated Number of Awards:** Contingent upon the availability of funds and the receipt of a sufficient number of meritorious applications, the total amount to be awarded is \$ 12 million over 2 years. The anticipated number of awards is 3-4.

Eligible Institutions/Organizations. Public/State Controlled Institution of Higher Education; Private Institution of Higher Education; Nonprofit with 501(c)(3) IRS Status (Other than Institution of Higher Education); Nonprofit without 501(c)(3) IRS Status (Other than Institution of Higher Education); Small Business; For-Profit Organization (Other than Small Business); State Government; U.S. Territory or Possession; Indian/Native American Tribal Government (Federally Recognized); Indian/Native American Tribal Government (Other than Federally Recognized); Indian/Native American Tribally Designated Organization; Non-domestic (non-U.S.) Entity (Foreign Organization); Hispanic-serving Institution; Historically Black Colleges and Universities (HBCUs); Tribally Controlled Colleges and Universities (TCCUs); Alaska Native and Native Hawaiian Serving Institutions; Regional Organization; Eligible agencies of the Federal government. **Eligible Project Directors/Principal Investigators (PDs/PIs).** Individuals with the skills, knowledge, and resources necessary to carry out the proposed research are invited to work with their institution/organization to develop an application for support. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support.

Number of Applications. Applicants may not submit more than one application. **Renewals and Resubmissions** Renewal (formerly competing continuation) and resubmission applications will not be accepted under this FOA. At this time, it is not known if this FOA will be reissued. **Number of PDs/PIs.** More than one PD/PI, or multiple PDs/PIs, may be designated on the application.

Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Others (see text field entitled "Additional Information on Eligibility" for clarification)

Additional Information on Eligibility:

Additional eligibility types: Local Governments Regional Organizations Indian/Native American Tribally Designated Organizations Public and non-profit private entities and coordinated networks of such entities are eligible applicants under this announcement. Additional information on eligibility may be found in the full announcement. Faith-based and community organizations are eligible to apply. Foreign entities are not eligible under this announcement.

Description

The Family and Youth Services Bureau (FYSB) is accepting applications for the Basic Center Program (BCP), which is authorized by the Runaway and Homeless Act to address runaway and homeless youth (RHY) problems. BCPs provide an alternative for runaway and homeless youth who might otherwise end up with law enforcement or in the child welfare, mental health, or juvenile justice systems. Each BCP must provide runaway and homeless youth with a safe and appropriate shelter, individual, family, and group counseling as appropriate, and aftercare.

Description

-Purpose. The National Institute on Drug Abuse (NIDA) invites research applications to develop and test the effectiveness of models that integrate screening, brief intervention, and referral to specialized treatment for individuals with drug abuse entering into primary care and other general medical settings. This is a joint effort between the National Institute on Drug Abuse (NIDA) and the Substance Abuse and Mental Health Services Administration (SAMHSA). - Mechanism of Support. This funding opportunity will use the NIH Research Project Grant (R01) award mechanism. -Funds Available and Anticipated Number of Awards. NIDA and SAMHSA intend to commit approximately \$3.5 million dollars in total costs [Direct plus Facilities and Administrative (F and A) costs] in FY 2008 to fund six to eight new grants in response to this RFA. The total amount awarded and the number of awards will depend upon funding availability as well as the quality, duration, and costs of the applications received.

Description

-Purpose. The purpose of this Funding Opportunity Announcement (FOA) is to encourage research that develops and tests new conceptual frameworks, models, and theories that explain the complex relationships between behavioral and social factors and oral health. -Mechanism of Support. This Funding Opportunity Announcement (FOA) will utilize the R21 grant mechanism. -Funds Available and Anticipated Number of Awards. NIDCR intends to commit approximately \$1.4 million (total costs) in FY 2009 to fund 4 □ 6 applications. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the quality, duration, and costs of the applications received.

Document Type:	Modification to Previous Grants Notice
Funding Opportunity Number:	HRSA-08-056
Opportunity Category:	Discretionary
Current Closing Date for Applications:	Jan 21, 2008
Expected Number of Awards:	450
Estimated Total Program Funding:	\$9,733,000
CFDA Number:	93.925 -- Scholarships for Health Professions Students from Disadvantaged Backgrounds
Cost Sharing or Matching Requirement:	No

Eligible Applicants

A school must meet all of the criteria listed below to be eligible to be considered for SDS funds for FY 2008. All requirements refer to full-time students (using the school's requirements for full-time): • Full-time students from disadvantaged backgrounds must comprise the following: 1) At least 10 percent of the total enrollment (full-time enrolled) of your program during Academic Year (AY) 2006-2007 (7/1/06-6/30/07), and 2) At least 10 percent of the total graduates (who were full-time students) of your program during AY 2006-2007. • Secondly, in order to receive any SDS funding, a school must have full-time economically disadvantaged students enrolled and graduated during AY 2006-2007. A school must meet all of the criteria listed below to be eligible to be considered for SDS funds for FY 2008. All requirements refer to full-time students (using the school's requirements for full-time): • Full-time students from disadvantaged backgrounds must comprise the following: 1) At least 10 percent of the total enrollment (full-time enrolled) of your program during Academic Year (AY) 2006-2007 (7/1/06-6/30/07), and 2) At least 10 percent of the total graduates (who were full-time students) of your program during AY 2006-2007. • Secondly, in order to receive any SDS funding, a school must have full-time economically disadvantaged students enrolled and graduated during AY 2006-2007.

Description

The scholarships for Disadvantaged Students Program was established by the Disadvantaged Minority Health Improvement Act of 1990, Public Law 101-527, Section 737 of the Public Health (PHS) Act. The purpose of this program is to provide financial assistance to disadvantaged health professions and nursing students. Institutions apply for SDS funds from the Department of Health and Human Services and are responsible for both selecting eligible recipients and determining their financial need. At least sixteen percent of total allocations go to schools that will direct SDS awards to nursing students. SDS funds awarded to schools must be used to award full or partial scholarship to eligible students enrolled in health professions programs on a full time basis. Schools must give preference to students for whom the cost of attendance would constitute a severe financial hardship, and to former scholarship recipients of the Exceptional Financial Need (EFN) and the Financial Assistance for Disadvantaged Health Professions Students (FADHPS) Program. The amount may not exceed a recipient's cost of tuition expenses, other reasonable educational expenses and reasonable living incurred in the attendance at such school.

Description

-Purpose: The goal of this funding opportunity announcement (FOA) is to accelerate the development of safe and effective medical products (including but not limited to devices, materials, drugs, neutraceuticals, cytokines or cytokine

inhibitors, free radical scavengers, anti-inflammatory agents, cellular therapy, etc.) to mitigate or to treat cutaneous injury arising from accidental or intentional exposure to ionizing radiation. Specifically, this new initiative will support research and development of the most promising new approaches and medical products to mitigate and/or treat radiation-induced cutaneous injury. -Mechanism of Support: This FOA will utilize the NIH Challenge Grant (RC1) award mechanism. -Funds Available and Anticipated Number of Awards: It is anticipated that \$4 million will be available in FY 2008 to support 4-6 new awards. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.
